

FUSIBLE APPLIQUE

Instructor: Rita Owen

SUPPLIES LIST

- Fusible appliqué pattern and fabrics – Budding Star kits contain pre-printed pattern sheets. No tracing required except for large pieces
- Pencil (mechanical pencil recommended)
- Fusible webbing – Steam-a-Seam 2 recommended for first project. Purchase either sheets in package (recommended) or off the bolt
- Paper scissors (sharp) – will be used to cut paper and fabric with fusible webbing attached (do not use good fabric scissors)
- Applique pressing cloth or parchment paper
- Sewing machine, clean and in good working order, with ¼-inch foot and zigzag or appliqué foot
- Threads for piecing and machine appliqué – for appliqué, either invisible thread (recommend YLI) or thread to blend with appliqué pieces. Recommend bobbin fill for bobbin if using invisible thread (minimizes tension issues)
- If your project requires a pieced background, please prepare the background beforehand and bring to class ready to start the appliqué work
